- JPMorgan Software Engineering Virtual Experience Program (10/2022)
  Monitored stock trends, created trading strategies using Perspective data visualization software
- JPMorgan Agile Virtual Experience Program (11/2022)
  Using Agile development & Scrum methodology, created user stories & backlog refinement
- Languages: JavaScript, GraphQL, HTML, CSS, Java, C
- Frameworks/Libraries: Node.js, React.js, Express.js, Gatsby, jQuery, Bootstrap
- Other tools: MongoDB, Git, WordPress, Heroku, command line
- Practices/Concepts: CRUD, MVC, RESTful API, Agile/Scrum, OAuth, accessibility

>Experience & Projects

- **Portfolio site** *(React.js, Gatsby, CSS, GraphQL, styled components)*
  - Executed on a schema to make edits & additions of projects simple & easy using GraphQL
  - Refactored desktop layout to be responsive on both tablet and mobile screen sizes
  - Improved SEO and accessibility by adopting Lighthouse suggestions
- **Yelpcamp** *(Node.js, Express.js, Bootstrap, MongoDB, RESTful API integration)*
  - Created full-stack web app that serves as a social hub and database for outdoor locations
  - Worked with databases and APIs to outsource image hosting and user account info
  - Protected user posts w/authentication—content is immutable without proper credentials
- **Spotify app** *(React.js, Express.js, OAuth2, Spotify API)*
  - Using Spotify's OAuth2, authenticates user account for retrieval of user's statistics
  - Displays queried user info in fun manner, ready for download and posting to social media
  - Made simple user interface for adjustment of query parameters
- **(Work) Bartender** – Threes Above High (OSU campus, Aug. '20 – present)
  - Lead shifts of 10 employees on gamedays & evenings, proactive in providing safe setting
